

Embedded IOT Systems Fall-2025

Project Title:

Smart Medicine reminder and Lock box

Group Members:

Laiba Taseen 23-NTU-CS-1258

Rabia Naseer 23-NTU-CS-1275

Malaika 23-NTU-CS-1291

Objectives:

- Design a smart medicine box that remind users to take medicine on time using notifications.
- Send alerts if user misses a dose.
- Store medicines securely using a lock that opens only at the scheduled time.
- Provide dashboard for setting medication schedules.

Hardware Components:

- ESP32 - Microcontroller (WIFI+ BLE)
- Servo Motor
- Push Buttons
- Buzzer
- Jumper wires
- Power supply
- Resistors
- Medicine Box

Software Components:

- Platfromio-vscode
- Arduino IDE
- Blynk Cloud

Core sensors:

- Push Button
- IR Sensor
- LDR Sensor
- DHT11/DHT22

System Architecture:
